DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 17 - 26, drawn to a method of making a composite magnetic body;

Group II, claim(s) 27 - 29, drawn to a magnetic composite body; and

Group III, claims 30 – 33, drawn to a magnetic laminate using a magnetic composite body.

2. The inventions listed as Groups I - III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons. First, the Examiner notes that process limitations in product claims are not germane for the determination of patentability barring evidence that the claimed process limitations result in a patentably distinct product. I.e. the patentability of a product does not depend on its method of making. As such, the claimed common special technical feature is a composite magnetic body made from a soft magnetic powder and a binder. The Examiner notes

Art Unit: 1773

that this is old in the art, since magnetic recording media and bonded magnets are known to be made by soft magnetic powder in a binder material.

3. No telephone call was made to applicants due to the complexity of the restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
